

# Prince Kumar Ojha

India | princeojha783@gmail.com | +91-7991961411 | GitHub | LinkedIn

## Professional Summary

B.Tech Computer Science graduate with hands-on experience in **web application development, backend services, REST APIs, Git, Linux, deployment workflows, and application troubleshooting**. Familiar with **DevOps practices, CI/CD concepts, Docker, Kubernetes, Terraform, cloud platforms, scripting, and Agile SDLC**. Experienced in debugging application issues, working with APIs and databases, using Git/GitHub for version control, and supporting development and deployment activities. Strong problem-solving mindset with a keen interest in building reliable, automated, and scalable software infrastructure.

## Technical Skills

**DevOps & Cloud:** CI/CD, AWS, Azure, GCP, Docker, Kubernetes, Terraform, DevOps Fundamentals, Cloud Fundamentals, Deployment Automation

**Scripting & Operating Systems:** Python, Shell Scripting, Bash, Linux, Command Line, Basic Automation

**Version Control & Tools:** Git, GitHub, GitHub Actions, Postman, VS Code, npm

**Programming:** JavaScript, ES6+, TypeScript, Python, C++, SQL

**Web Technologies:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design

**Backend & APIs:** Node.js, Express.js, REST APIs, CRUD, Axios, JSON, Authentication, Authorization

**Database:** MongoDB, Mongoose, SQL, NoSQL, Database Design, Data Modeling

**Development Practices:** SDLC, Agile, Debugging, Troubleshooting, Functional Testing, Root-Cause Analysis, Code Review, API Testing

## Professional Experience

**Web Developer – INREXT Pvt. Ltd.**

Jun 2025 – Present

- Developed and maintained web applications using **React.js, Next.js, Node.js, Express.js, MongoDB, and REST APIs** within an Agile software development environment.
- Used **Git and GitHub** for source-code management, branching, version control, and collaborative development workflows.
- Supported application deployment and environment configuration, troubleshooting issues across development and deployment workflows.
- Worked with backend services, APIs, databases, and application configurations to identify and resolve development and runtime issues.
- Performed **debugging, log analysis, API testing, and root-cause analysis** to improve application reliability and resolve production and development issues.
- Worked with Linux/command-line environments and gained practical exposure to **DevOps, CI/CD, containerization, cloud, and deployment concepts**.

**Frontend Developer Intern – Einfratech Systems**

Sep 2024 – Apr 2025

- Developed responsive applications using **React.js, JavaScript, HTML5, CSS3, and REST APIs**.
- Integrated backend APIs, handled application data, implemented validation and error handling, and resolved frontend and API issues.
- Used **Git/GitHub** for version control and collaborated with developers during development, testing, and deployment activities.
- Performed functional testing, debugging, issue investigation, and troubleshooting to improve application quality and reliability.
- Worked in an **Agile SDLC** environment and collaborated with backend and QA teams to support application releases.

## Projects

**DevOps CI/CD Deployment Project**

Docker — GitHub Actions — AWS — Linux

- Containerized a web application using **Docker** to provide a consistent and reproducible application environment.
- Created a **CI/CD pipeline using GitHub Actions** to automate application build, testing, and deployment workflows.
- Worked with **AWS cloud fundamentals** and Linux-based environments for application deployment and configuration.
- Used Git-based workflows to trigger automated builds and streamline software delivery from source code to deployment.

**Real Estate CRM – MERN Full Stack Application**

MongoDB — Express.js — React.js — Node.js

- Developed a full-stack CRM application using the **MERN Stack** with REST APIs, authentication, authorization, and role-based access control.
- Built backend services and MongoDB schemas for employees, customers, properties, notices, holidays, and leave workflows.
- Performed API testing, debugging, error handling, data validation, and **root-cause analysis** to improve application reliability.
- Used Git/GitHub throughout development and worked with environment configuration and application deployment workflows.

**Education**

**Bachelor of Engineering – Computer Science and Engineering**

Aug 2020 – Aug 2024

Chandigarh University

**Achievements**

- Solved **100+ Data Structures and Algorithms problems** on LeetCode, strengthening analytical thinking, logical reasoning, and problem-solving skills.
- Hands-on experience with **Git, GitHub, REST APIs, Linux, Docker, CI/CD concepts, cloud fundamentals, application debugging, and software development lifecycle practices.**
